Proving the Existence of Allah Through Nature: Part 2

Imagine an animal so small that its brain is no bigger than a sesame seed. It makes a journey miles away from home without a GPS, physical map, or any audible guidance to navigate there. It knows precisely where it is going, locates what it is hunting for, and returns home without taking a detour.

Meet the honeybee—a tiny-winged marvel the size of a paperclip that does this every day. No apps. No satellites. Absolutely pure, divine code. This little creature possesses abilities that would make even the most advanced technology look undeveloped.

Allah Almighty says in the holy Quran:

وَاَوۡحٰی رَبُّكَ اِلَی النَّحۡلِ اَنِ اتَّخِذِیۡ مِنَ الۡجِبَالِ بُیُوۡتًا وَّ مِنَ الشَّجَرِ وَ مِمَّا یَعۡرِشُوۡنَ ﴿النحل ۶۸﴾

And your Lord revealed to the bee, "Make an abode in the mountains, and in the trees, and in the roofs.

ثُمَّ كُلِیۡ مِنۡ كُلِّ الثَّمَرٰتِ فَاسۡلُكِیۡ سُبُلَ رَبِّكِ ذُلُلًا ؕ یَخۡرُجُ مِنۡۢ بُطُوۡنِهَا شَرَابٌ مُّخۡتَلِفٌ اَلۡوَانُهٗ فِیۡهِ شِفَآءٌ لِّلنَّاسِ ؕ

اِنَّ فِیۡ ذٰلِكَ لَاٰیَةً لِّقَوۡمٍ یَّتَفَكَّرُوۡنَ ﴿النحل ۶۹﴾

Then eat from all kinds of fruit and proceed upon the easy paths of your Lord." A colorful liquid comes out of their bellies, there is healing therein for people. In this there is a sign for those who contemplate.

There are numerous miracles if you consider the life of a honeybee.

1) Divine GPS:

Bees fly up to 5 miles from their hive, zigzagging across forests and cities. Scientists say that they navigate by the position of the sun, the magnetic field of Earth, and even mental maps that they create naturally in their brains. The main question is: Which app do they use to navigate? Who taught them how to do all this?

The Holy Quran answers: "proceed upon the easy paths of your Lord." These "apps" are instilled into their senses naturally by Allah Almighty.

2) Honey: A Pharmacy in a Hive

Scientists claim that a single bee visits around 2 million flowers to create one pound of a natural medicine that Allah Almighty created inside them - Honey. This medicine cures cuts, kills germs, and boosts immunity. As the Quran tells us: “there is healing therein for people.”

3) Architectural Genius:

It is stated in al-Tafsir al-Kabir by Imam al-Razi: Bees build hexagonal honeycombs with almost equal sides — something even skilled humans cannot do without measuring instruments. But bees? They do it naturally.

Geometry proves that if honeycombs were not hexagonal, there would be empty spaces between them. Hexagon is the shape that fits closely without gaps. This means bees can store the maximum amount of honey using the least amount of wax. Furthermore, this structure provides strength to the honeycomb, allowing it to hold the weight of the honey and the bees themselves. How does a tiny insect understand this? Only due to Allah Almighty's flawless design.

4) A Kingdom with a Leader

A colony of honeybees has a leader called the queen bee. This bee is bigger and leads the entire group. The worker bees work, guard, and even carry this queen bee while flying around a swarm. The level of organization in something as tiny as this insect is incredible.

Again, the question is: Who taught them how to organize themselves in this way? Only Allah Almighty

Conclusion

In short, if we stop for a moment and think about nature, we'll see clear signs that there is a Creator who has made everything in a perfect and beautiful way – that is Allah Almighty.

Look at the honeybee—an insect as tiny as a paper clip! It flies miles without getting lost, makes perfect hexagons, designs a great organizational structure, and produces sweet honey that contains cure. Isn't it amazing?

Consider what we would discover out if we examined bigger things—like trees, mountains, oceans, or even stars! Everything that surrounds us is proof that Allah Almighty exists and that He is all powerful and all wise.

Now when you see a tiny bee buzzing around a flower, don't just brush it off. Rather, pause for a moment, look closely and remember: even the smallest of creatures carries a sign of His existence.
